LabV | The intelligent laboratory

Today: Digitization

Excel	LIMS standalone

Manual and paper-based processes, data silos and isolated solutions determine everyday life in the laboratory today.

Tomorrow: Industry 4.0

LabV

Connectivity	Data Analysis	Forecasts	Self-optimization

In tomorrow's lab, devices, people and systems will be connected end-to-end. Thanks to data and automated processes, not only the quality but also the performance of your products will improve.

Use the potential of Industry 4.0 in your laboratory with LabV

| Less documentation effort, more time for testing, interpretation of data and for your customers	Complete documentation of all data in the laboratory for compliance with regulations	Establishment of a modern database as the basis for intelligent analyses and forecasts	Scalable, secure and always up-to-date and accessible from anywhere	Fast and cost-effective implementation

The most important functions of **LabV**

Accessible from anywhere, with all core functions for end-to-end lab management - intuitive collaborative and cross-vendor
